Table Machine
Zero-Glue-Line
TMS1810

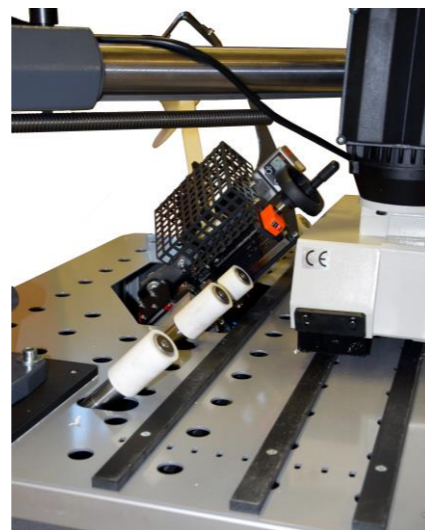

Description:

- The table machine for
- Zero-glue-line process (Laser-edge)
 - up to 65 mm edge height
 - up to 3 mm edge thickness
 - contour parts
 - compatible Schugoma Concept

Additions:

- tilting device
- 0 - 45°tilting range
- table extension
- panel feeding
- additional rollers

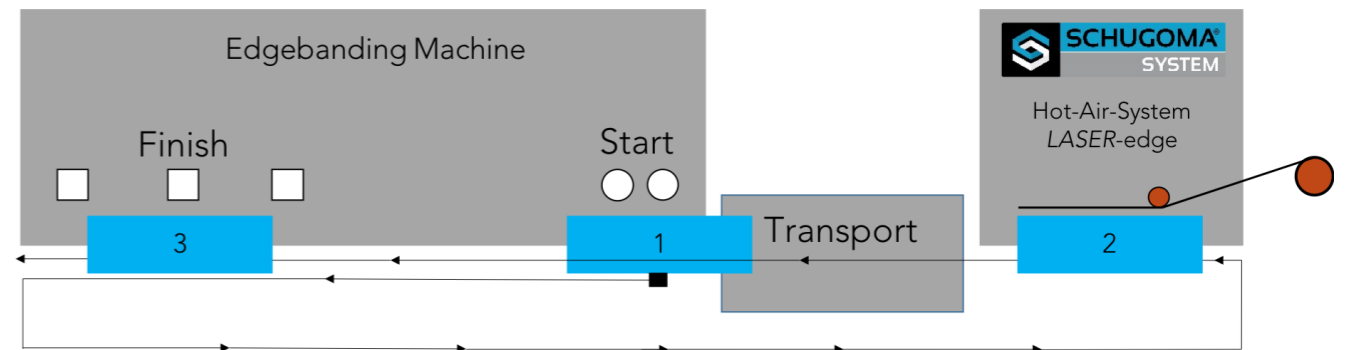

TMS1810

Concept:

In conjunction with your existing edgebanding machine, you can process *Laser-edges* (zero joint) with the hot-air system WITHOUT changing.

- first step: joint milling (edgebanding machine / CNC).
- second step: the laser edge is applied with the TMS1810.
- third step: the workpiece receives the perfect finish with your edgebanding machine!

- 1. Start : Pre-milling / or sizing on a CNC machine
- 2. Schugoma: Hot-Air-System / LASER-edge
- 3. Finish : Zero-glueline / Perfect Quality

Technical Data:

- compressed air : connection : 1/2 "
- consumption : 210 l/min
- electric load : 4,9 KW
- required area : length : 1.000 mm
- width : 700 mm
- height : 850 - 950 mm
- Weight : 170 kg
