

LAS 2407

ZeroLine®

TABLE FOR STATIONARY OPERATION

SCHUGOMA®
SYSTEM

NEW

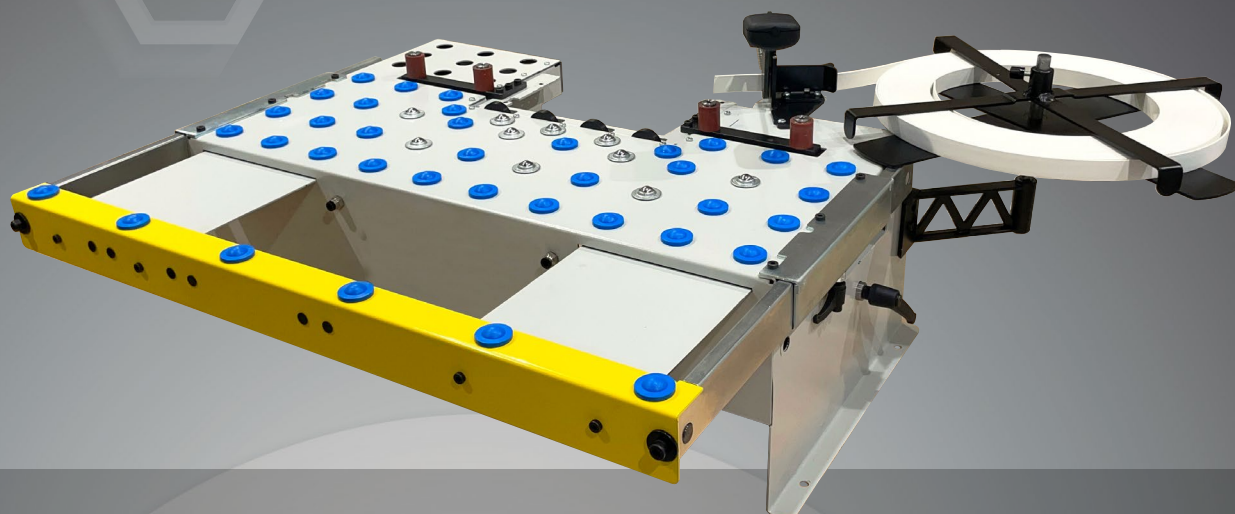

Table with extendable frontal guide to work with a total stability for stationary use, allows to transform the portable LAS 2407 ZeroLine Edge Bander into stationary edge bander in an easy way. Thanks to that it is possible to have the advantages of both banding systems: portable and stationary.

The great table surface increase the possibilities and applications, like the banding of panels of different types. The table equips a roller holder as well as an end cutting device for the rear cut.
